Special Options: Double Glazing & Guided Wire – Enquire for pricing.

Special Shapes: Special shapes and cut outs made to specification.

Suitable for: Any internal installation where heat, light and/or privacy control are required. Effective sun and light control.

Warranty: 2 Years

## Care

Focus Blinds are easy to clean by first of all closing the slats and then removing the dust with a feather-duster, short-haired brush or a soft cloth. If the slats are very dirty, the best way to remove this is with a damp cloth. You can also use a vacuum cleaner set at the lowest level. You can also gently spray-clean larger surfaces and then let them dry properly.

NB: If the steel components in the head rail of the blind is not properly dried, there is a risk of it rusting.

You can of course also have the blinds thoroughly cleaned by a professional cleaning company that uses an ultrasonic treatment system.

The above recommendations have been drawn up with care. We are, nevertheless, unable to accept responsibility for the results of cleaning.
